TRAINING SERVICES

Training Services

Introduction

Our training services enable operatives, supervisors and managers to not only meet legal requirements, but also to develop and enhance the skills of the workforce, raising the competency of the team.

Our Training Consultants are qualified to teach a wide variety of courses that are essential to businesses in the construction industry, from classroom-based to practical training.

We have also developed a series of short courses, which are RoSPA accredited, to suit businesses from all industries.

We are also pleased to launch our Lunch & Learn sessions, providing bitesize briefings on important topics.

Training Services

CITB and IOSH Courses

In partnership with Construction Health & Safety Group, we offer classroom-based certificated courses:

- SMSTS (5 days) and SMSTS Refresher (2 days)
- SSSTS (2 days) and SSSTS Refresher (1 day)
- IOSH Managing Safely (3 days)
- IOSH Leading Safely (1 day)

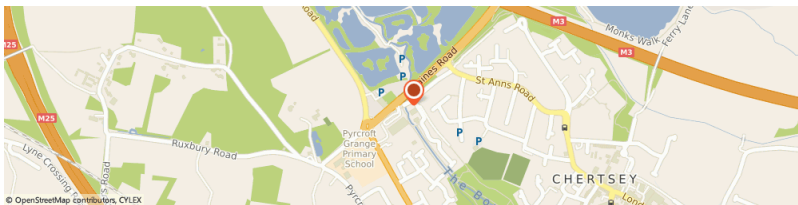

Member 2022 - 2023

Venue

The Construction Health & Safety Group training venue is located at John Ryder Training Centre, St Ann's Road, Chertsey, Surrey, KT16 9DG

Training Services

In-House RoSPA Accredited Courses

We are pleased to offer RoSPA accredited short (half-day) courses, which can be carried out at one of our Central London venues, or at your own premises.

In-House courses include:

- Fire Marshal
- Manual Handling
- Asbestos Awareness
- Environmental Awareness
- Health & Safety Awareness
- CDM

The maximum group size for these courses is 12 people. Your venue will need to have adequate seating and desks, with space and power for a laptop and projector screen

For Fire Marshal courses, if conditions allow, we can carry out an element of practical fire extinguisher training.

Training Services

First Aid Courses

We can provide one-day Emergency First Aid training (suitable for low-risk environments, such as offices), three-day First Aid at Work training (for higher risk environments, such as construction sites) and refresher training.

These courses can be carried out at your premises, with a maximum of 12 delegates. Sufficient floor space will be required for practical work. Delegates must be able to carry out floor-level work as part of the course, which requires both practical assessment and a theory test to be successfully completed in order to pass.

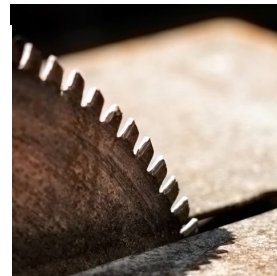

Training Services

On-Site Training

Our Associate Construction Training Consultant can attend your site to carry out the following courses:

- Abrasive Wheels
- Manual Handling
- Working at Height Awareness
- PASMA
- Confined Space
- NPORS Plant & Construction training
 - Banksman
 - Slinger Signaller
 - Crane
 - Lorry Mounted FLT
 - MEWPs
 - Excavators (180 / 360)
